

Startling Facts Given in "Our Earth is in Trouble" Post

Number	Initials	Startling Fact
1	JH	I was startled that 72% of the population of Mali lives on 1\$ a day. I do not think that you need money to be happy, but 28% of people in Mali are undernourished. This means that too many people cannot afford to eat.
2	KO	I am engineering student.Global warming is a serious problem.In the future, I want to engage in this problem and solve it.
3	MM	I was surprised to the thing that the risk of early death by 23% in Uganda and 30% in Cameroon can be reduced by clean water,and the risk of early death by 57% in Egypt and 59% in Peru can be reduced by a flush toilet. Therefore,I think that I should
4	MO	I was startled that the life expectancy at birth of Swaziland is 31.3 years old. This shows that most of people in the country is dead before 30 years old because of hungry or disease.
5	YY	I was startled Education index. The best rate is 0.99 of Norway and the worst rate is 0.23 of Burkina Faso. Japan is 0.94. I was shocked a great difference between the two.
6	YH	I was startled Education index. The best rate is 0.99 of Norway and the worst rate is 0.23 of Burkina Faso. Japan is 0.94. I was shocked a great difference between the two.
7	YK	I was startled that there are many children that birthweight is less than 2,500 grams.Children that less than 2,500 grams is born more than 20% of all children in a country,at more than 15 countries.I did not know this.I worry about that children can live
8	TK	I was startled that population ages 65 and older(% of total).In 2004,Japan was 19.2%.This was second of all.But Japan is expected that Japan will be 26% in 2015.This is first of all.More and more I think Japan become aging society.
9	KM	I was startled by the fact that Under-five mortality rate(per 1,000 live births). In 1970, Japan is 21.After 34 years,it is 4.This problem was reformed. But in some countries,this problem was not much reformed.For
10	RT	I was startled that population of dominica. In this country, population is only 0.1 million. But population of japan is 128 million. I think that dominican is hard on their life.
11	TN	I surprise that Japan is the longest the average life expectancy in the world. Also Japan is higher than other country. By contrast Africa is very low.
12	KF	I was startled that only 21% children in Niger can receive basic education. I think the world has been unfair socially and we have to know various
13	HI	I am interested in Total population. Japan's population is expected that it will increase 0.1 millions from 2004 to 2015. This statistics gave big shock to me.I think ,this figure is very short. Why rich country's population such Japan don't increase? We
14	AS	I was startled that the rate of population living below 2\$ a day. Surprisingly,94.1% of the population of Zambia lives on 2\$ a day. I always spend 5\$ a day. I think abstain spending money.
15	KT	I was startled that probability of not surviving past age 40 is 74.3% in Swaziland. We think it easy that we see our 40th birthday come round in japan. But people in Swaziland think it very hard. This fact is caused by they don't have sufficient knowledge
16	SN	I was startled that some data show important things.For example, Male employment in agriculture of Japan shows 5%,Haiti shows 63% and Argentina shows 1%.And Female employment in services of Japan shows 73% ,Surinam shows 97% and Yemen shows 9%. After seeing
17	DM	I was surprised to the ,1.2billion people without access to safe water.1.2billion people is 10% of all of the world population!!Unbelievable!!

18	HT	I was startled that HDI of Sub Saharan Africa is 47 percent.But HDI of Japan is 94 percent.I think the world has many difficult problems.We must think it. But HDI of Japan is higher than africa. I think Japan must cooperate with them for world peace. We s
19	KK	I was startled the life expectancy at birth.The rate of Japan is 82.1years old.But ,the rate of Swaziland is 31.1years old.Difference between the rate of Japan and Swaziland is about 50years.I was very shocked with
20	HM	I was startled that the life expectancy index of low human developing country is very low. In addition, the life expectancy index of Swaziland is lower by nine times than Norway!
21	NT	I was suprised to see UNHDR homepage.Only43.4years old a Japanese "Life expectancy at birth"have in Nigeria whereas Japan is 82.2 years old. "People without access to an improved water"52% "Children underweight for age"29% I think that the above is connect
22	HT	I was startled that data of the life expectancy at birth. Life expectancy of developed countries is about 80 years old, but life expectancy of developing countries like countries of africa is half of developed countries!
23	SK	I am interested in Carbon dioxide emissions index.United States is about 5times as many the emissions as japan. We must prevent Global warming.We must cooprate with world people.
24	TA	I was startled that HDI of Sub Saharan Africa is 47 percent.But HDI of Japan is 94 percent.I think the world has many difficult problems.We
25	KT	I was startled that Life expectancy at birth HDI lank lower and lower, Life expectancy at birth is down. Ecspecially, Swaziland is 31.3 very
26	DS	I understood that annual population rate is high in countries where HDI Rank is low and in warmer countries. I knew that annual population rate has decreased in most countries every year and I was sad.
27	Ytaka	I was startled that in the Global Projection of Subjective Well-being japan lanked 90
28	匿名	I am engineering student.I think that global problem is serious problem.Global warm is advancing everyday.we must control it for the
29	MK	I was sartled that Carbon dioxide emissions of America. America represents more than tirty percent of world total. I think that the amount of Carbon dioxide emissions cut can not realize without help of America.
30	TY	Natural destruction becomes a very big problem today.This leads to gloval warming and it is not the problem that you may leave.
31	KK	I was startled that the most electricity consumption country in 2003 is Iceland.This country used 3.5 times japan.
32	K Taka	I was startled that japan is seventh at Long-term unemployment (as % of labour force) in HDI rank. Untill now, I thought our place of japan in the world is better than this fact.
33	KS	UNHDER made In the world ever map of happyness. In this map,Denmark is world's happiest country,japan ranked 90. Japan is richest country.But it does not mean that Japanese is happy.
34	anonymmous	I was startled that Population ages 65 and older(% of total).In this,Japan is higer % than athers country.I worry about the future in japan.
